

YOUR LOCALIZATION HOTKEY

AUDIO LOCALIZATION

Jonckers provides a full set of audio localization skills and capabilities. Drawing on over fifteen years of experience in the production of video games, courseware, support materials, and corporate presen-

tations. Jonckers has completed projects for a wide array of clients including Microsoft, Cisco, Dreamworks, ABC and Citigroup.

JONCKERS AUDIO CAPABILITIES

- Audio recording
- Audio overlay
- Audio studio direction
- Voiceover and lip synch
- Full service editing
- File post production
- Subtitling
- Script creation and review

Our audio/visual resources employ only the most experienced voice and acting talent that cover an extremely wide range of languages (in excess of fifty). All of our voice talents are native-speaking professionals and are pre-auditioned for the quality and authenticity of their voices. The studio, based in the US, is fully equipped with the latest technology to ensure that your voice recordings turn out exactly as you intended them to.

Besides the standard equipment expected within a full service recording studio, the sound studios are specifically designed with post-production and localization in

mind, providing facilities to communicate with linguists and refer to other linguistic materials during the recordings.

Jonckers has the capability of working with and to virtually any file type and format and can deliver your recordings to exact specifications, or recommend settings best suited to your project goals. We can also deliver in almost any file format or transmit final files through FTP. Flexibility and cost effectiveness are our keys to success.

For more information on audio localization please visit www.jonckers.com.
