JONCKERS VOICE

What is Jonckers Voice?

JONCKERS Voice is the voice talent portal that hosts a catalogue of voiceover samples, enabling customers to select the ideal voice to suit their project.

How it works

Voice talents are categorized in 3 levels based on their voice quality.

Jonckers resource management team continually organize screening and collection of new voice samples for addition to the JONCKERS Voice catalogue. They are then categorized and organized by target language. At the beginning of a voice over project, customers will receive credentials for them to log in and select the voice they would like to use in their projects. In the event customers do not find the ideal voice they want, they can specify their expectations for Jonckers resource management team to conduct further searches for a relevant solution.
